REGENT Education

The brand name is Regent College.
It has three higher education schools and one sixth form, with an independent school of 14-16.
Higher Education business is "ring fenced" and it is a regulated business. The regulator is Office for Students.
All other non-regulated businesses are set up via other legal structures.
REGENT has legal structures set up in India, Dubai and USA, along with UK as the HQ.

The most important element to focus at Regent is our customer. At the Hub level the Hub Management of 4 people needs to make sure a management style of management by forensic detail that means that the management team needs to know about every student's whereabouts. At the bottom of the pyramid and whilst the pyramid is coming down the management and leadership team from a student perspective must deploy management style called management by exception.
